

## 2 Installation Instructions

This section explains the steps for installing Originations Design Studio. The installation can be done in two different types of environment:

- On a single machine, please refer to **Installing Originations Design Studio on a Single Machine**.
- On a Citrix XenApp 6.5 server farm, please refer to **Installing Originations Design Studio on a Citrix XenApp 6.5 Server Farm**.

### 2.1 Installing Originations Design Studio on a Single Machine

**NOTE:** System Administrator rights are needed in order to install Originations Design Studio. If the Studio is running on Windows Vista, Windows 7 or Windows Server 2003/2008, ensure the User Access Control is disabled during the installation.

#### Before Installing

Ensure the File Server conforms to the technical prerequisites provided in the **Decision Analytics Servers Installation Guide**.

#### ➤ *To Install Originations Design Studio using the Wizard*

1. Launch the **setup-ods-client.exe** file. The software will load the installer.

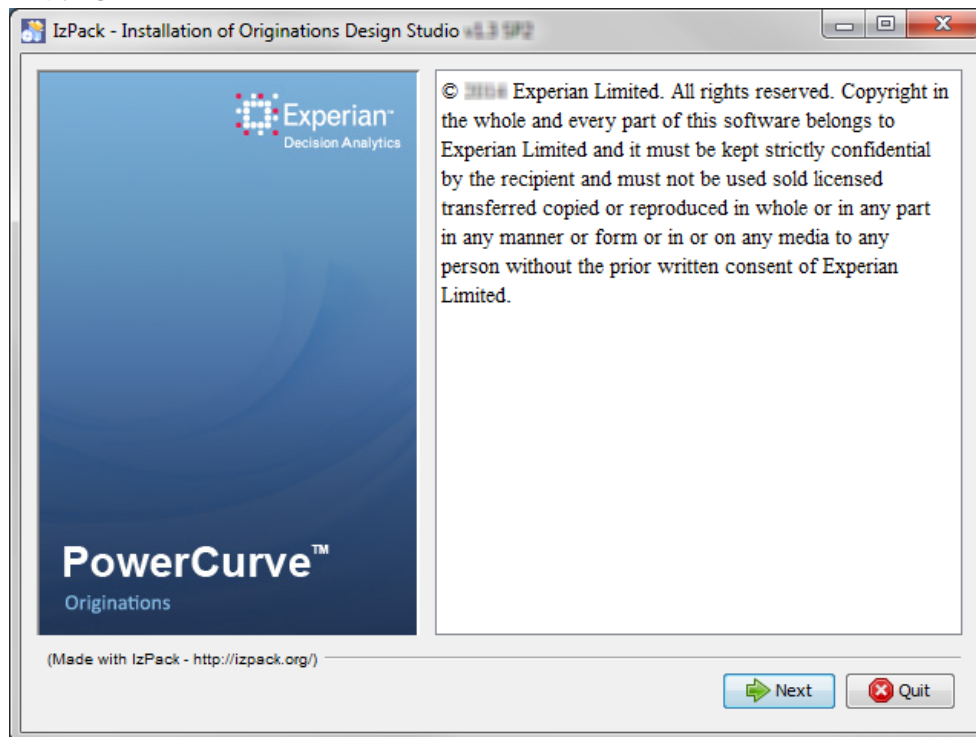

**NOTE:** A Security Warning message may appear if the installer is launched directly via an internet browser or executed after downloading the installer. Please ignore the warning message and proceed, as this will not affect the installation process.

For more information, please refer to the **Troubleshooting** chapter.

## Installation Guide

Originations Design Studio V1.3 SP3

2. The first screen confirms the software application being installed and displays the copyright statement. Click **Next** to continue.

3. In the next screen, enter the installation path for your Originations Design Studio installation, and then click **Next**.
